

Protecs and Red Line Oil to Partner with Foley Lewis Racing in 2023

PROTECS

We're proud to continue our partnership with PROTECS Inc. for the 2023 NHRA Camping World Series season. A full-service project and construction management company, PROTECS Inc. will serve as our primary branding partner for the Gatornationals at Gainesville Raceway, the 4-Wide Nationals at zMAX Dragway, and the Pep Boys Nationals at Maple Grove Raceway. They're also an associate branding partner for the entire season. "It's a big deal to start off our season with PROTECS Inc. back on the side of the car," said Doug Foley. "This is our third season with PROTECS on board. They're engaged partners and they're excited about what we're doing." A big thank you to Chris DiPaolo for his continued support.

RED LINE OIL

Red Line Synthetic Oil is back on board as our oil partner. Since returning to full-time NHRA Top Fuel competition, Red Line has been our oil of choice. We trust Red Line's oil and other lubricants with our 11,000-horsepower, 330 MPH Top Fuel dragster, but they also offer products you can trust in your daily driver, lawnmower, or motorcycle. "Teams like ours have used Red Line Oil for years for a reason," said Doug Foley. "Their products have been developed, tested, and refined by racers and enthusiasts in the toughest environments. We need the best products available to compete in NHRA Top Fuel, and Red Line certainly fits the bill. We're proud to have the continued support of Mark Beatty and #TeamRedLineOil."
